Subject: R. J. Corman Railpower Awarded Locomotive Contract from Montreal Port Authority

R. J. Corman Railpower is pleased to announce that the Montreal Port Authority (MPA) has awarded us the sale of one 2,000 hp RP20BD GenSet locomotive. This sale is accompanied by a follow-on optional award of four additional GenSets between 2010 and 2012.

Guided by its mission to bring prosperity to the Greater Montreal region and to Canada while respecting the environment, MPA evaluated locomotive solutions that greatly reduced harmful pollutants and improved fuel efficiency while operating. MPA additionally sought products that helped meet its objective of being as competitive as possible while evolving with market trends, technological advancements, economic change and the competition. After evaluating all the industry options, MPA chose R. J. Corman Railpower to assist them in meeting those objectives, while upholding their vision to be safe and reliable.

“R. J. Corman Railpower looks forward to building a long term partnership with the Montreal Port Authority by demonstrating that we are not just another locomotive supplier. We will provide the MPA with post-delivery technical and operational training and support, ensuring their success,” stated R. J. Corman Railpower COO, Bruce Greinke.

R. J. Corman Railroad Group is a privately owned holding company for the following key operations:  
Shortline Railroads • Switching Operations • Rail Construction • Track Material Distribution
