R. J. Corman Railpower is pleased to announce a GenSet locomotive kit sale to Norfolk Southern Railway Company for delivery fourth quarter 2011. The 2,000hp RP20BD will be used in the New York Shared Assets area. The purchase of this clean energy locomotive was accomplished through a public-private partnership consisting of monies from New Jersey DOT, New York/New Jersey Port Authority, and Norfolk Southern.

“Norfolk Southern continues to be a strong partner for Railpower, both as a customer and as a recognized experienced vendor. As our relationship is constantly growing and changing, Railpower is excited to see what joint ventures are on the horizon for our two organizations,” stated R. J. Corman Railpower Vice President, Dave Malay.

In addition to building this GenSet locomotive kit for operation on its own lines, Norfolk Southern's Thoroughbred Mechanical Services (TMS) assembled five locomotives for various other R. J. Corman Railpower customers. TMS currently has an additional eleven units in process, and Norfolk Southern and R. J. Corman Railpower continue to explore other partnership opportunities.

R. J. Corman Railroad Group is a privately owned holding company for the following key operations:
Shortline Railroads • Switching Operations • Rail Construction • Track Material Distribution
Warehousing • Aviation Services • Equipment Rental • Deraiment Services • Railroad Emergency Response
My Old Kentucky Dinner Train • RailPower
