Subject: R. J. Corman Railpower Delivers First of Five Locomotives to M&ET

R. J. Corman Railpower announces the first of five RP Series GenSet locomotives for delivery to Modesto & Empire Traction Company. While reducing emissions and fuel consumption, the RP Series locomotives will help M&ET perform unique operations, provide efficient service, and ultimately, meet its nearly 50 customers' expectations.

Funded through California's Carl Moyer Program dollars distributed by the San Joaquin Valley Air Quality Management District, these five RP20BD locomotives will immediately assist M&ET's ever-growing business by providing eco-friendly switching functions and unrivaled reliability and performance. Currently operating seven Railpower GenSets, M&ET can be considered the greenest short line in North America, achieving reductions of diesel fuel use and greenhouse gas emissions up to 45% and nitrogen oxides (NOx) and particulates by 80% - 90% with each locomotive in operation.

"Since the beginning of the M&ET-Railpower relationship, both groups have worked hard in partnership to develop customer-friendly options for the GenSet locomotives. M&ET is truly a pioneer in the green locomotive movement, as well as a respected contributor toward the evolution of the RP Series GenSets, and we are excited to continue our partnership with the delivery of this order," stated R. J. Corman Railpower Vice President, Dave Malay.

R. J. Corman Railpower will deliver the remaining four units of the order later this year, providing on-site training, remote diagnostics, and local support to ensure maximized asset utilization and unrivaled performance.

R. J. Corman Railroad Group is a privately owned holding company for the following key operations:
Shortline Railroads • Switching Operations • Rail Construction • Track Material Distribution
Warehousing • Aviation Services • Equipment Rental • Derailment Services • Railroad Emergency Response
My Old Kentucky Dinner Train • RailPower • EcoPower
