R. J. Corman Railpower is pleased to announce that it was awarded a contract from Sierra Northern Railway (SERA) for a GenSet locomotive kit. This is partially funded by the Environmental Protection Agency (EPA) Targeted Air Shed Grant Program. The locomotive kit will be provided to SERA in modular subsystems to be assembled with Railpower supervision and SERA-provided labor and tooling. Kit delivery is expected in the 4<sup>th</sup> Quarter of this year.

“R. J. Corman Railpower looks forward to partnering with Sierra Northern employees to build an Ultra-Clean GenSet locomotive. In general, locomotive kit projects provide the perfect opportunity for our technology advantages to shine. Allowing customers to reduce overall product cost and be involved in learning about the technology up front ensures the long lasting success of these types of projects,” stated R. J. Corman Railpower VP, Dave Malay.

After completion, the kit locomotive will receive the same outstanding R. J. Corman Railpower extended warranty, technical support, remote diagnostics, and on-site training for which all RP Series GenSet locomotives are known.

R. J. Corman Railroad Group is a privately owned holding company for the following key operations:  
Shortline Railroads • Switching Operations • Rail Construction • Track Material Distribution  
Warehousing • Aviation Services • Equipment Rental • Deraiment Services • Railroad Emergency Response
